FsPassengers Scenario*

## **About this scenario:**

You are thinking of starting an airline. You have always had a knack for aviation, and a few months ago, you earned your single engine commercial type rating. You are also IFR rated. You live in Orlando, Florida, a major east coast airport. A nice bit of cash (\$30000000) has been emptied into your unsuspecting pockets from an unknown saving fund of your grandfather's. Trouble is, your goals may get a bit hard. You can only fly small aircraft to begin with, and you move up in the ranks. You must become an international company. And, of course, fly at least a 75,000 pound airplane, about a small 737. You must reach c9. There is not much room for error.

## **Installation:**

It is highly recommended that you run the installer application. If you do, make **sure** that the directory is a few folders down from your main FS9 directory. If you choose to manually install it, copy the contents of the *manual setup* folder to Your FS9 folder /FsPassengers/config/MissionGamesCfg/ folder.
